AIS Membership and Experience

I have been an active member of AIS for over 10 years. I have served our community in several roles, including: Associate Editor for ICIS 2025 and ECIS 2022; reviewer for multiple editions of ICIS, ECIS, and AMCIS; and journal reviewer for Information Technology & People and Information Systems Journal.

Statement of Platform

Dear AIS Colleagues,

As a candidate, my priority is to strengthen AIS Region 1 as an inclusive and collaborative community that advances impactful IS research across the Americas.

I am committed to fostering stronger collaboration among researchers from North, Central, and South America by addressing regional barriers, championing underrepresented groups, and promoting equitable access to AIS conferences, publications, and activities.

I am particularly interested in promoting research approaches that emphasize contextual sensitivity and respect for local knowledge. This is essential to ensure that IS scholarship remains relevant, responsible, and responsive to the social, cultural, and historical conditions in which information technologies are embedded.

I intend to broaden interactions between IS scholars, local governments, and local industries in Region 1 to increase the impact of IS research on practice and local development.

Furthermore, I will work to broaden participation and support career development, not only for doctoral students and early-career scholars, but for researchers at all career stages in Region 1, by helping position their work on the global stage. I also seek to promote collaboration and foster stronger connections between Region 1 scholars and colleagues in other AIS regions.

Finally, I aim to enhance engagement and communication, ensuring that all Region 1 members feel welcomed at AIS events and activities, connected to the community, heard, and supported.
